

SKILL 23

```
root@PC: ~/os_lab/combined_complex_lab
root@PC:~# cd ~/os_lab/combined_complex_lab
root@PC:~/os_lab/combined_complex_lab# cd ~/os_lab/combined_complex_lab
root@PC:~/os_lab/combined_complex_lab# nano valgrind_clean_shell.c
root@PC:~/os_lab/combined_complex_lab#
```

A terminal window with a dark background and light gray text. The window title bar shows a penguin icon, the text 'root@PC: ~/os_lab/combined_complex_lab', and standard window controls (minimize, maximize, close). The terminal content shows a sequence of commands: a root prompt, a 'cd' command to navigate to the directory, a second 'cd' command (redundant), the 'nano' command to create a file named 'valgrind_clean_shell.c', and a final root prompt.
